

Adjustable Console Mount

The adjustable ProClip Mounting Platform has been designed and tested to fit perfectly in your vehicle and it passed the high quality control demanded and provided by Brodit. In most vehicles it is placed on the right side of the console. However, in some vehicles it is placed on the left side of the console and in a few cases there are different solutions e.i. mounting in the cup holder.

The adjustable console mount attaches on the side of the console next to the gear shift. The adjustable console mount installs in the vehicle without damaging the interior -no tools needed and no dismantling of the dashboard is required. Anyone can install the adjustable console mount. The installation takes less than a minute.

The mount is made of black ABS plastic. It is heat resistant up to +100°C (212° F). It comes with detailed installation instructions.
