

Monitor Mount Between Front Seats

For monitors with a vertical slot in back.

*Between seats monitor mount.
Multimedia-monitor in place.*

Multimedia-equipment and entertainment in vehicles are becoming more and more common. A lot of DVD- and video units are being installed in cars. How do we solve the fitting problems in a neat and easy way?

We offer a easy-to-use system for mounting multimedia-monitors in the vehicle. It is based on a car specific mount with a monitor mount for monitors with a vertical slot in back. The screen will be placed between the front seats, giving the back seat passangers a perfect view. The screen can be tilted and angled in order to avoid reflections. You can take the monitor with you when leaving the car. The interior of the vehicle will not be damaged, as no drilling holes is required.

The installation of a monitor is quick and easy.

1. A monitor mount is to be mounted on the arm rest or the center floor console between the front seats. The mounts are car specific.

2. The monitor is to be mounted on the mount. It provides a firm fit, but can easily be removed when leaving the car.

The monitor mount fits a number of monitor models with a vertical slot in back, some of them are

Blaupunkt IVMS-5601, IVMS-7001
 Clarion VMA 5092, 6493, 7192, 8582
 LCM 702R, LCM 50R, M7011, HR-system
