

Holders for PDA, Handhelds

Passive/Active holder with tilt swivel.
Also for Destinator- or charging-/data-cable

By using a PDA Handheld Holder you will always have your PDA within easy reach in the car. The holder tilts and swivels for better viewing and avoiding reflection. Products such as the Nokia 9210 Communicator which can be used both in a closed and open position can be placed in the holder in both ways.

The tailor-made Brodit PDA Holder has a perfect fit. It holds your PDA safe and steady.

The holder is mounted onto a tilt swivel, which allows you to tilt and swivel the holder in order to avoid reflections in the display.

The holder is manufactured in black ABS plastic which can withstand temperatures of up to 100°C (212°F).

There are also Passive Holders for Mobile Phones, Two-Way radios, taximeter printers, GPS navigation systems, etc.

Holders are available with and without charging device, and with connector for Destinator- or charging-/data-cable.

The Brodit PDA Holder works great with the ProClip Mounting Platform and most other mounting devices on the market.

(1.)

(2.)

Compaq iPAQ 38xx, 39xx, 54xx

(3.) Fujitsu Siemens Pocket Loox

- A perfekt fit!
- Easy and convenient!
- Made in Sweden.

(4.) Nokia 9210i Communicator

(5.) Qtek 1010 (O2 XDA/Joey)
