

# Passive Holder for Two-Way Radio

## Two-way radio in the car

The holder is specifically designed for each radio model. Fits all original battery models.

Headsets that connect to the bottom of the radio, can be used when the radio is in the holder.

The holder is manufactured in black ABS-plastic which can withstand temperatures up to 100°C.

Install onto a ProClip Mounting Platform -quick and easy without damaging the interior of your vehicle.
