

HEADREST MOUNTS

MOUNTING PLATFORM FOR TABLETS IN THE BACK SEAT

The Headrest Mount is car specific and works as a mounting platform for any Brodit holder. The mount attaches around the headrest bars and offers a firm base for installation of e.g. a tablet holder.

With your device in a holder attached to the headrest mount, it is always within easy sight and reach for your back seat passengers.

The installation is quick and easy. No special tools or dismantling of the interior is required. Detailed instructions with pictures are included.

Crash tested mounting solutions: Certain Brodit holders are crash tested and approved for use on certain Brodit headrest mounts. Read more about crash tested holders on our website.

Benefits:

- Safe and convenient
- Discreet design, color: black
- Compatible with all Brodit holders
- Predrilled AMPS holes or other industry standard
- Made of high grade ABS/Acetal plastic
