

Monitor mount for Tablet DVD Between Seats

For monitors with hole underneath for thumb screw attachment ("-thread), i.e. a camera tripod mount

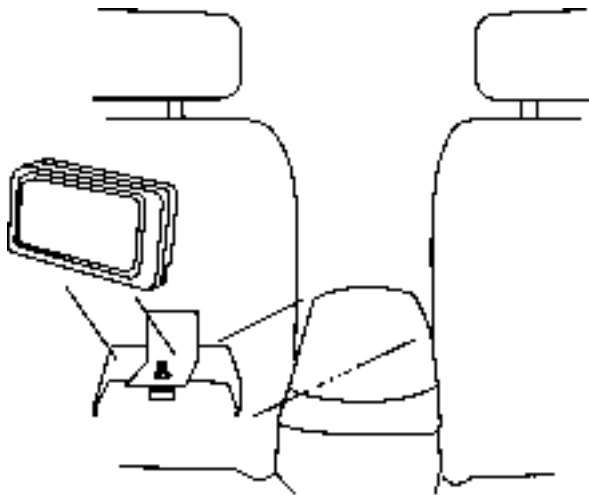

A between seats monitor mount for monitors with thumb screw attachment, Tablet DVD in place.

Multimedia-equipment and entertainment in vehicles are becoming more and more common. A lot of DVD- and video units are being installed in cars. How do we solve the fitting problems in a neat and easy way?

We offer a easy-to-use system for mounting multimedia-screens in the vehicle. It is based on a car specific mount with a monitor mount for monitors with a hole underneath for thumb screw attachment. The monitor will be placed between the front seats, giving the back seat passangers a perfect view. The screen can be tilted and angled in order to avoid reflections. You can take the monitor with you when leaving the car. The interior of the vehicle will not be damaged, as no drilling holes is required.

It is easy to install a monitor for multimedia or a Tablet DVD in the car.

1. First you attach a monitor mount onto the arm rest or center floor console between the front seats. The mount is car specific and tailor made for each car model. It fits monitors with a hole underneath for thumb screw attachment ("-thread).

2. Then attach the monitor onto the mount. It is firmly in place, and you can take the monitor with you when leaving the car.
